JTradeRoutes Mod Change Log
by Jeckel
v1.002 Col2 v1.00

v1.000

Initial mod created.

v1.001

Fixed some TXT_KEYs.

Broke TXT_KEY file up into several files.

Changed Trade Routes Advisor Screen's Key Binding from *Shift + T* to *Alt + T* so it won't conflict with the Cheat Menu.

v1.002

Added Advisor Menu Mod by Dale so the Trade Routes Advisor Button on the Main Interface will be shown in a second row on the top right of the monitor.

Added a Button to the top left of the Trade Routes Advisor Screen. This button will close the Trade Routes Adviosr and open the Domestic Advisor.

In the Domestic Advisor, the Trade Routes Button will bring up the new Trade Routes Advisor instead of the default Domestic Advisor Trade Routes Page.

Fixed Error, where this pdf had JTradeRoutes Mod Readme in the header instead of JTradeRoutes Mod Change Log.. Oops.
